INTRODUCTION

The Pao-chi Thermal Power Plant No. 2 is located 1.8 nautical miles (nm) southwest from the city of Pao-chi on the west bank of the Ching-chiang Ho (River). The Pao-chi Fabrication Industry is 1.1 nm southeast of the power plant.

BASIC DESCRIPTION

The rail served power plant is located within a fenced area approximately 2,150 by 850 feet. The plant appeared to be operating on all available coverage.

The boilerhouse, generator hall, and the control house have been expanded since however, lack of frequent coverage precludes determination of exact completion date. A second cooling tower and a coal processing building have been added.
